

Dr Stolar received her medical degree at The Chicago Medical School, North Chicago, IL, and her B.S. in Biochemistry at UCLA, Los Angeles, CA. She is board certified in Pediatric Neurology and Developmental Behavioral Pediatrics after successfully completing the fellowship program at Dana-Dwek Children's Hospital – Sourasky Medical Center (Ichilov), Tel Aviv, Israel. She completed her pediatric residency at Meir Medical Center, Kefar Saba, Israel.

Dr Stolar has been working as a clinical director of the Early Childhood Services at the Autism Center of Assaf Harofeh Medical Center, Israel, since 2009. The Autism Center is a national center undertaking diagnosis, treatment and research of autism spectrum disorders, which is a combined project of Assaf Harofeh Medical Center and ALUT (The Israeli National Association for Children with Autism). Dr. Stolar is the Medical Director of “Alutaf”, the Early Intervention Program that consists of eleven daycare centers for treating toddlers with ASD. She established and directed a multi-disciplinary eating disorder clinic for children with ASD (active until 2015) and a pharmacological clinic at the Autism Center.
