

Manuel Guzman

Department of Biochemistry and Molecular Biology, Complutense University, Madrid, Spain

Manuel Guzman is a Professor of Biochemistry and Molecular Biology at Madrid Complutense University. His research work has allowed to characterize new effects and signaling pathways mediated by cannabinoid receptors, as well as putting forward new physiopathological implications derived from them, especially in the fields of oncology and neurology. He has published 160 scientific articles and 7 patents, and has supervised 21 PhD theses. He is an Academic Member of The Spanish Royal Academy of Pharmacy, as well as a member of the Board of Directors of the IACM.
